

EmailPOS Editor User Guide

Welcome to the EmailPOS Editor!

This guide will help you understand how to create, edit, manage, and schedule your email communications efficiently.

1. Getting Started: Accessing the Editor

Accessing the Editor:

Log in to the system.

The main navigation bar at the top provides quick links to the "EmailPOS Editor" (your main working area) and the "Email Communications Calendar."

If you are an admin, you will also see links to "Manage Users" and "Create New User."

administrator functions

2. Step 1: Start a Mail / Load a Mail

This section is where you begin your email creation process.

Reference Code (Optional):

- To start a new email, leave this field blank. A unique 6-character reference code will be automatically generated for your new email upon creation.
- To load an existing email, enter its exact 6-character reference code into this field.

Personalisation Type:

- No Personalisation: For standard emails without recipient-specific content.
- Personalisation - via Salesforce List Email: For emails using Salesforce's list personalisation.
- Personalisation - via Salesforce Marketing Cloud: For emails leveraging Salesforce Marketing Cloud's personalisation.

"Create Email" Button: Click this to proceed to the main editor interface.

"Duplicate Email" Button: If you've entered an existing Reference Code, clicking this will load that email's content into a new email with a new reference code, allowing you to create a copy without altering the original.

"Search Existing Mails" Button (🔍) Opens a modal where you can search for existing emails by various criteria (Subject Line, Reference Code, Author, Sender Email, Region). From the search results, you can either Load an email for editing or Duplicate it. You can also Delete emails if you have the necessary permissions.

Sender Mobile Phone

Enter sender mobile phone

Region: Select the target region for the email (e.g., AMER, UKI, DACH). This is used for internal tracking and populating the correct footer address in the generated HTML.

Audience: Define the primary audience (e.g., Channel, End User, Internal).

Email Sent From Address: The email address that will appear as the sender.

Send Time and Date: Use the date and time picker to specify when this email is scheduled to be sent. [This is crucial for the Calendar View.](#)

Subject Line: The subject line of your email.

Translate Button (🌐): Click this button next to the input field to open the translation modal. You can translate your subject line into various languages using a large language model (LLM).

Preheader Text: A short summary text that follows the subject line when an email is viewed in the inbox.

Translate Button (🌐): Available for preheader text translation as well.

Background Image URL (optional): Enter the URL for a background image for the entire email.

"Select Image" Button: Opens the Image Manager tool, allowing you to select an image from your uploaded library or upload new ones.

Logo URL: The URL of the logo image that will appear at the top of your email. (Default is provided) - only change if using the tool to build an email for a third party

Sender Name, Sender Email, Sender Mobile Phone: Contact details for the sender of the email.

EmailPOS Editor User Guide

Article Blocks

Article blocks are the modular components that make up the main body of your email. You can add, arrange, and customize them.

"Add Article Block" Button: Click this to add a new content block. A modal will appear asking you to choose between:

Single Column Article: A block with a single image, header, and content area spanning the full width.

Double Column Article: A block split into two columns, each with its own image, header, and content.

"Load Saved Block" Button: Opens a modal to browse and load pre-saved, reusable article blocks. You can search for blocks by name or type.

Selected Block Controls:

When you click anywhere on an Article Block in the form, it will be highlighted as "selected," and the "Move Up," "Move Down," and "Remove" buttons will become active.

"Move Selected Up": Moves the highlighted article block one position up in the email layout.

"Move Selected Down": Moves the highlighted article block one position down.

"Remove Selected": Deletes the highlighted article block from your email (requires confirmation).

"Save This Block" Button: Inside each article block, this button allows you to save the current block's configuration as a reusable block, which can be loaded into other emails later.

Article Block Settings:

Background Color: Choose a background color for the specific article block.

Image URL: (Single/Double Column) Enter the URL for the image within that block. Use the "Select Image" button to pick from your library.

Header Text: The main heading for the block/column.

Alignment: Choose text alignment (Left, Center, Right).

Font Weight: Set the font weight (Light, Normal, Bold).

Translate Button (🌐): Available for header text translation.

Main Content (Text Editor): A rich text editor for the main body of the block/column.

Formatting: Use bold, italic, underline, alignment, lists, and links.

Emoji Button (😊): Click to select and insert emojis.

Translate Button (🌐): Available for content translation.

Button Text & Button URL (Optional): If you want a call-to-action button, enter its text and the URL it should link to.

Column Split (Double Column Only): A slider to adjust the width ratio between the left and right columns.

4. Live Preview

The "Live Preview" iframe on the right side of the editor shows a real-time rendering of your email as you make changes.

"Desktop View" / "Mobile View" Buttons: Toggle between a wider desktop preview and a narrower mobile preview to check responsiveness.

Click-to-Select Blocks: You can click on an article block within the live preview iframe to automatically select it in the editor form on the left, making it easier to navigate large emails.

5. Generated HTML Code

After you are satisfied with your email, click the "Generate Email Template" button.

The full HTML code for your email will appear in the large text area.

"Download HTML" Button: Downloads the generated HTML code as an .html file to your computer.

"Copy HTML" Button: Copies the entire HTML code to your clipboard for easy pasting into your email sending platform.

"Send Test Email" Section:

Recipient Email: Enter an email address to send a test version of your email.

"Send Test Email" Button: Sends the currently generated HTML as a test email to the specified recipient.

EmailPOS Editor User Guide

6. Image Manager Tool

Accessible via the "Select Image" buttons next to image URL input fields.

This modal allows you to:

Upload New Images: Upload image files directly to your server.

View Existing Images: See a library of all previously uploaded images.

Select Image: Choose an image from the library to automatically insert its URL into the corresponding input field in the editor.

Delete Images: Remove images from your library.

7. Translation Feature

Accessible via the "Translate" buttons (🌐) next to text input fields and within Rich text editors.

Original English Text: Displays the text to be translated.

Translate to: Select your desired target language (e.g., French, German, Japanese).

"Translate" Button: Uses AI to generate the translated text.

Translated Text: Shows the translation result.

"Insert Translated Text" Button: Places the translated text back into the original input field or Quill editor.

8. Email Communications Calendar

Accessible via the "Email Communications Calendar" link in the top navigation.

Purpose: Provides a visual overview of all scheduled emails, allowing for better planning and tracking.

Filters:

Region: Filter emails by specific geographical regions (e.g., AMER, UKI). Flags are displayed next to the region for quick visual identification.

Audience: Filter emails by target audience (e.g., Channel, End User).

Calendar Navigation: Use "Previous" and "Next" buttons to move between months.

Calendar Grid: Displays days of the month, with scheduled emails appearing directly on the relevant dates.

Event Items: Each email entry on the calendar shows its Subject, Audience, Region (with flag), and Send Time.

Clickable Events: Clicking on an email event on the calendar will take you directly to the emailpos.php editor with that email pre-loaded for editing.

"Emails for Selected Day" List: When you click on a specific day in the calendar, a detailed list of all emails scheduled for that day (filtered by your selected criteria) will appear below the calendar. Each item in this list also provides an "Edit Email" link.

9. Logout

Click "Logout" in the main navigation bar to securely end your session.

This guide should provide a solid foundation for using the EmailPOS Editor.
